**Whom ever it may concern**

Dear Sirs

We are the architectural consultants for Credit Suisse who have offices and trading floors in Canary Wharf, London.

HLW were instrumental in bringing on board Access Flooring Services (UK) Limited with their Joint Venture Production (JVP) product for Credit Suisse's latest project at 5, Canada Square, Canary Wharf, which was negotiated with AFS. This was after we had researched the product market for raised access floors with our client and were convinced that the JVP systems were of the best quality and competitively priced.

Subsequently Credit Suisse has begun negotiations with AFS (UK) Limited to supply the JVP product on a global basis for their projects.

We at HLW are very happy with the performance of AFS (UK) Ltd on site and their product, both of which we will continue to recommend.

Yours faithfully

Andrew Talbot
